

## European countries that require completing documents before traveling [LIST]

Travel restrictions related to the COVID-19 pandemic have been largely lifted, but some countries require passengers to complete additional documents such as a Health Declaration Form and a Passenger Locator Form prior to the flight. **Note!** Failure to complete the required forms and other documents will result in the passenger **not being allowed on board the airport** or being turned back at the arrival airport by local services.

### List of European countries that require passengers to complete additional documents

Filling out the forms is **mandatory for all travelers**, not only the person who made a booking.

**Example:** if you book tickets for 5 people, then each passenger who will travel with you must complete the required documents.

Remember that in some cases these documents must be completed **no later than 72 hours before the scheduled departure**. Therefore, we recommend that you read the travel rules first. Check if the authorities of the country you are traveling to require **completing appropriate documents** and forms.

**Note!** All the fields in the forms provided in the table below must be filled in.
